

Constructing companywide innovative with SAP Business One®

Don Construction Products, specialists in innovative construction materials, partnered with SkyTech to implement SAP Business One across multiple offices to meet local requirements with ease. Now management can stay up to date across all countries, so decisions can be made at the right time.

Before: Challenges and Opportunities

- Don Construction Products' previous ERP system required a huge amounts of labor-intensive customization before entering a new market.
- Consolidating data from multiple systems was time consuming.
- A new cloud-based ERP platform was required that could be seamlessly plugged into new markets, meeting local regulations and tax regimes.

Why SAP Business One and SkyTech

- SAP Business One can match localization requirements with ease, offering a user-friendly cloud-based platform.
- SkyTech has a highly qualified team with strong technical knowledge who continue to support Don Construction Products beyond implementation.

After: Value-Driven Results

- Since deployment, approval cycles can be segmented and workflow has rapidly improved.
- All databases have been consolidated, helping management to make decisions quickly.
- Real-time data has enhanced the supply chain and procurement side of the business.
- Cash conversion and liquidity has improved.
- Inventory levels can be seamlessly managed helping to plan purchases and production.
- Customer satisfaction has gone up, helping to grow the business successfully.

“SAP and SkyTech offer us the most **user friendly and high-quality enterprise resources planning system.**”
